

Sudeep Sigdel

Backend Developer | BSc. CSIT Student

Kawasoti, Nawalpur, Nepal | sudeepsigdel123@gmail.com | [GitHub](#) | [LinkedIn](#) | [Website](#)

Profile

Backend-focused Computer Science student experienced in building scalable APIs and real-time systems using FastAPI and PostgreSQL. Skilled in authentication, role-based access control, and event-driven workflows. Strong interest in backend engineering and system design.

Core Skills

Backend: FastAPI, REST APIs, WebSockets, JWT, OAuth2

Databases: PostgreSQL, SQLAlchemy, Alembic, MySQL

Languages: Python, C, C++, C#

Tools: Git, Docker (basic), Postman, Linux (basic)

Concepts: API Security, RBAC, Database Design, DSA, OOP

Projects

CrisisCare (Backend)

- Built backend for a disaster relief coordination platform
 - Implemented role-based authentication for users and volunteers
 - Enabled real-time volunteer notifications using WebSockets
- Tech:* FastAPI, PostgreSQL, WebSockets

SocialMediaAPI

- Developed secure JWT-based authentication and protected routes
- Implemented pagination, search, and filtering
- Designed rule-based voting system (one vote per user)

Tech: FastAPI, PostgreSQL, Alembic, SQLAlchemy

ChatApp

- Built real-time chat backend with authentication
- Implemented one-to-one and global messaging
- Tracked online users using WebSockets

Tech: FastAPI, WebSockets

Education

BSc. CSIT – Tribhuvan University

CGPA: 3.612 (Current)
